There seems to be a demand for hurdle racing. A pleasing change from steeplechasing.

The Boston Athletic Club, which expects to have big opening in November, is expected by "Hub" sports to eclipse everything on this side.

At a recent meeting of the Executive Committee of the N. four A.'s, it was decided to reproduce the programme of last year's great championship at the Eighty-sixth street and Eighth avenue grounds, with one exception and with the addition of a weight unlimited tug-of-war. The change will be an increase of the distance in the bicycle race from one and one-half to two miles.

If ever a race track was a big ditch Monmonth Park course was yesterday. Horses that never swerved before ran every sort of way in yester day's mire.

It is always easter to suggest improvements than it is to effect them, but the Monmouth people have benefited so much from one or two hints that others might not be thrown away. The start in he seven-eighths mile races at this track are entirely hidden from view by a clump of bushes that would e much better out of the way. To many seeing the start is seeing half the race, and even those most familiar with the colors are ofttimes mixed ip when a big field suddenly dashes into view and runs into the backstretch.

IT IS TO BE A STERN FIGHT BROUGHT TO A CERTAIN FINISH.

Good Fruit Already Borne by "The Ever ing World's " Efforts and More Results Coming-The Companies Using the Bobtail System Begin to Realize Their Dan ger-What the Levy Inquest Shows.

The days of the bobtail car are numbered and the number is not a large one.

THE WORLD in its 'morning edition is mak ng a vigorous and popular agitation on the No Conquetor, No Fare" line, while THE EVENING WORLD is urging on the prosecution which may result in the indictment of the officers of the railroad company for constructive manslaughter.

A special session of the Legislature, too. has furnished an opportunity to again intro duce an act prohibiting the use of the bob tail system.

With such a fight going on all along the line, the companies who use this homicidal system have had to materially increase their army of lawyers and lobbyists, and their output in the matter of dollars will be as great, probably, as though they employed a

great, probably, as though they employed a conductor for each car at fair wages.

"It is the bold attack of The Evening World which most affrights the magnates of the bobtail system," said a prominent lawyer yesterday. "It is aimed directly at their persons and liberties and contemplates putting upon them the brand of the felon.

"They knew that they were maintaining a dangerous system by which many beople were being maimed and killed, and that they were receiving from it a fair return for their

were being maimed and killed, and that they were receiving from it a fair return for their investment. They perhaps never thought of their criminality, or if they did, dismissed the thought with the idea that the Legislature had legalized it.

"Now that these men realize that their invasions upon the rights of the people have amounted to a possible felony, they are thoroughly aroused to the danger of their position and will fight for life really in this contest."

The scene in Coroner Messemer's court at the Levy inquest yesterday proved the truth of this gentleman's assertions. There were present three lawyers, alert and

watchful of the interests of the Twenty-third waterful of the interests of the I wenty-third Street Railway Company, and with all the cunning of their craft, attempting to make the evidence which most implicated their client tend to show contributory negligence on the part of the poor woman they had killed. It was an unsuccessful attempt, however

and the jury, which is a most intelligent body of men, paid little heed to the attempts body of men, paid little need to the attempts to confuse honest witnesses. Yesterday's testimony showed conclusively that the death of Mrs. Lovy was the fault of the arrangements which oblige a driver to turn his back to his horse to make change.

A Revenue Office Wanted in Harlem

To the Editor of The Evening World: As a manufacturer of cigars, I am com pelled whenever I require revenue stamps to take a day off, as the saving goes. As I manufacture in Harlem and the revenue office is ufacture in Harlem and the revenue office is on Fourteenth street, much of my valuable time is taken up in doing my duty by Uncle Sam. I would suggest that a small amount from the river and harbor appropriations or from coast defenses against an invisible enemy would help in maintaining a respectable office even in Harlem. At any rate, I have no doubt it would pay Uncle Sam in the long run.

It is a comedy in three acts,

the scene being located in England.

September, in its first days, will probably see Steele Mackaye's new play, 'A Noble Rogue," at the Fifth Avenue. Later, Edwin Booth and Lawrence Barrett will appear in costly productions of "Othello" and "The costly productions of "Othello" and "The Merchant of Venice" for a season of eight weeks. Roland Reed will appear in "The Woman Hater," Sept. 13, at the Bijon, and the regular Casino season will begin with "Oolah" about the middle of the month. "Oolah" about the middle of the month. Dockstader's, the Star and other places will reopen in September, which month will also see "The Kaffir Diamond" replace "The Queen's Mate" at the Broadway. The new Union Square Theatre will probably be ready in October, when Daly's will also begin a new season. The Madison Square Theatre and Metropolitan Opera-House will open in November, the former with "Partners."

Those who wish to study evolution in burlesque have had an admirable opportunity at the Chicago Opera House, where "The Crystal Slipper" is now in the height of its success. During the past week every one in the audience has been presented with a copy of the original libretto. By comparing it with the performance each one is able to discover the aston shing changes it is possible to make in a piece of that character in the short space of five weeks.

"Nadjy" continues to attract large audiences at the Casino, and is certainly one of the most remarkable successes of the season. The roof garden is just the place in which to The root garden is just the place in which to pass a hot summer evening, a fact that ap-pears to be fully appreciated by the "can't-get-aways." Noticeable features of the Casino audiences are the large theatre parties from Nyack, Peekskill, Irvington, Stamford, New Rochelle, Somerville, the Oranges and other adjacent summer resorts.

Toneida and Lilly Adams, the two pretty Toneida and Lilly Adams, the two pretty little children of George H, Adams, are to be members of Charles Ellis's "Caspar, the Yodler," company during the conning season. Last season they played with Harry Miner's "Silver King" company. There is a very great demand for stage children just now, or Mr. Adams would have adhered to his original idea of allowing Toneida and Lilly a season of idleness. Toneids, by the bye, was named after Tony Denier, the pantomimist.

Frederick Warde will pass under the managerial reins of Joseph Brooks next season. R. E. Stevens, one of the stalwarts of the business, will travel with him as acting manager, and James Jay Brady, for a long time the business manager of the Union Square Theatre, will herald the way ahead. This is a good combination for business effect. Adole Belgarde will be Mr. Warde's leading lady. As in duty bound, Mr. Brady is circulating stories about Mr. Warde, and tells one of a performance of "Virginius" in a Colorado town. The audience had refused to leave the theatre, after the play was over, leave the theatre, after the play was over, and the manager induced Mr. Warde to go

on the stage and talk to them.
Said the tragedian: "Ladies and gentlemen, the play is over. Virginia is dead, Dentatus is dead, I am dead, Appius Claudius is dead."

He Was America's Most Successful Commu porary Novelist.

IMPRCIAL TO THE EVENING WORLD. NEWBURG. July 20. - Rev. E. P. Roe, the novelist, died at Cornwall of neuralga of the heart, at 10,30 last night.

Edward Payson Roe was the most success ful of contemporary American writers of fiction. His stories have all appealed directly to the hearts of the people, hence his almost unbounded popularity.

REV. E. P. ROE. He was born on the banks of the Hudson in the town of New Windsor, N. Y., in 1838. His early home is described in his popular story, "The Opening of a Chestnut Burt," and again referred to in the description of the quaint old garden that has so important place in his new book, "A Face Illumined." He studied at Williams College, having He studied at Williams College, having the ministry in view, and after a year at Auburn Theological Sem nary in 1862; he responded to the Government's urgent call, and took the chaplaney of the Second New York, or the Harris, Cavalry, After two years in the field President Lincoln appointed him one of the chaplains of the Fortress Monroe hespitals. Just before entering on this new duty he joined, as a volunteer, the celebrated raid, in the spring of 1864, in which Col. Dahlgren was killed, and which had as its object the release of the Union prisoners at Richmond.

At the close of the war Mr. Roe accepted a call from the Presbyterian Church at Highland Falls, N.Y., within a mile of West Point, and very soon entered with the people on an

and very soon entered with the people on an effort to erect a new church edifice. This involved a long and difficult struggle, but was successfully accomplished, Mr. Roe being indetatigable in his efforts to raise the neces-

sary funds.
In the spring of 1874 Mr. Roe removed too
Cornwall on the Huds n, near his early
home, where, to counteract the tendencies of too sedentary pursuits, he began the cultiva-tion of small fruits and plants, and had a thriving nursery. Here, in this pleasant home, amid the most beautiful natural scenery, have been written most of his later

home, amid the most beautiful natural scenery, have been written most of his later stories.

Ten years ago one had hardly heard of E. P. Roe as an author. At the present time, however, there are few who do not know him a-one who, if we may rate success by the wide circulation of a writer's books, is our most successful novelist. His first literary veuture, "Barriers Burned Away," is now in its forty-ninth or fiftieth thousand. "What Can She Do?" his second story, is in its thirty-third thousand; "Opening a Chestnut Burr," his new volume, is in its forty-ninth thousand; and almost equally large editions mark the sale of his more recent books. His latest novel has almost attained the phenomenal success whirh attended "Barriers Burned Away." It is in its forty-sixth thousand. Such popularity as these figures show is certainly remarkable. The aggregate circulation of Mr. Roe's stories is nearly half a million of copies. One book must represent on an average three readers at least. Thus 1,500,000 persons read and appreciate his novels. This fact alone would assure Rev. E. P. Roe's claim to the attention of any literary critic.

There was something in the fact that Mr.

There was something in the fact that Mr.

E. P. Roe's claim to the attention of any literary critic.

There was something in the fact that Mr. Roe is a minister, and thus the author of stories, all of which are informed by deep religious convictions. Sugar-coated pills have a strong attraction for many people. These books, also, are universally regarded as well adapted for Sunday-schools, and probably few churches are unprovided with copies, for people who do not approve of novel-reading in theory find nothing exceptionable in them. This fact, therefore, undoubtedly explains a great deal of their of their popularity.

There is also another cause which is explanatory of the wide circulation of these books. Mr. Roe not only writes to the middle class, but also about them. He portrays admirably the ordinary, every day life of common people—often, it must be confessed, of rather commonplace people. But such people enjoy nothing better than hearing about themselves. They find in Mr. Roe's book their own thoughts and their own aspirations. They seem, while reading of the experience of others, to be recalling their own. Thus, in "Without a Home" the author own, Thus, in "Without a Home" the author own prophis habit. More people than one has any idea of are addicted to this habit. Many of the young women, and even of the girls, in our New England factories are absolute slaves to the practice. And when the author writes in his preface "I am sure I am right in fearing that in the morphia hunger and consumption one of the greatest evils of the future is looming darkly above the horizon of society," he speaks what is believed to be the truth. Any one who deals thrillingly in a novel with a subject such as this cannot fail to write effectively. In the same story, also, he gains the love of every shop-girl in our large cities, by his sympathetic treatment of the evils and hardships which they are forced to bear. No wonder then, that, making such subjects the motive of his stories, he is pherocoments of the subject steed to be an an over the processed. or Paul Steindorf, who received applause, flowers, congratulations and a handsome clock, "Mikado" will fill out the week's bill at the Terrace.

It was no use remonstrating with him in his present condition. I adopted pathological measures of the most stringent kind. For an hour Tommy underwent a succession of shocks of a drastic and searching nature, emerging from them at length in an exhausted, but otherwise more favorable condition. Then I sent him back to report at the office, and to make out the best case for himself

have fallen so far at the first break. However,

there he was, and the question was, what to do

that he could. It turned out rather better than I had feared. They gave him a scolding and warned him of the consequences if he should be so dilatory about his errands again, but they did not suspect the actual state of the case, and I fancy Tommy assisted their unsuspicion by telling them a lot of lies. But when I saw Mrs. Tymeock (as ) made a point of doing the next day) I found her in a state of depression and pessimism for which I was unprepared. In the end she told me her story. The man to

whom she had sacrificed her youth and happiness was a good-looking, plausible scamp, of a type sufficiently familiar, who had bamboozled her into leaving her father's roof, holding out gittering generalities of love and gay life in the city, and, on his side, having an eye first on the old gentleman's money, and secondly on the gratification of a selfish caprice. The latter object he presumably stiained; but he falled in the former, for her father, perhaps not satisfied that his daughter was really married at all (and it must be confessed that the evidence on this point was not entirely conclusive), and partly because he had conceived a rooted aversion to Mr. Tymcock, refused to allow them so much as a single collar. Mr. Tymcock's profession was that of bartender, and he could command fair wages; but it soon became evident that he regarded the woman in the light of a nulsance, and from an early period he had betrayed a constitutional tendency to intoxication. Tommy was born, and this event completed Mr. Tymcock's estrangement; he refused to contribute anything to the unhappy woman's support, and she, after a prolonged course of suffering in hospitals and elsewhere, obliged to become a washerwoman or starve. Mr. Tymcock, though he would give her nothing, ye so par recognized their relationship as to relieve her, from time to time, of a large part of her say ings; and he would doubtless have continued this
